

GRAZIELE DE OLIVEIRA COSTA

Product Designer | UX/UI, Information Architecture & Design Systems for Complex B2B/SaaS & FinTech Products

Salvador, Brazil | ohgrazidesigner@gmail.com | linkedin.com/in/grazioliver | Open to remote roles and relocation

PROFESSIONAL SUMMARY

Product Designer with 11+ years across visual and digital design, including 5+ years applying UX/UI principles to complex digital products. Path started in graphic design, building a strong foundation in visual hierarchy and communication, and evolved toward the logic behind the screen: how people navigate, where workflows break down, and how design decisions shape usability and business outcomes.

Works across the full product design cycle, including problem framing, research synthesis, information architecture, user flows, wireframing, high-fidelity prototyping, responsive UI, accessibility, and design systems, for complex, fragmented ecosystems in education, B2B SaaS, FinTech, and AI-assisted operations. Connects user evidence, business constraints, and technical feasibility, and documents the reasoning behind decisions, not just the final screens.

CORE SKILLS

Product Design | UX Strategy | UX/UI Design | Information Architecture | User Flows | Interaction Design | User Research Synthesis | Usability Testing | Wireframing | High-Fidelity Prototyping | Responsive Design | Design Systems | Accessibility (WCAG) | UX Writing | Design Documentation | Developer Handoff | Figma | FigJam | Notion | HTML | CSS | Basic JavaScript, React, and TypeScript

SELECTED PRODUCT DESIGN PROJECTS

Product Designer, Independent Case Study

2026

First Seven Days of the Student Journey, Higher Education / EdTech

- Led a six-week UX audit and strategic onboarding redesign spanning a public website, student portal, learning platform, and academic systems.
- Synthesized student support records and usability evidence to define priority problems involving access, documents, financial tasks, first-class preparation, and fragmented navigation.
- Designed eight responsive desktop and mobile flows in Figma, supported by shared components, clear UX writing, and WCAG 2.2 AA considerations.
- First-round usability testing reached 95.8% direct task success, an average SEQ score of 6.4/7, and a SUS score of 81.9; documented remaining issues and next validation steps.

Product Designer, Independent Research Study

2026

Optima, AI-Assisted Supply Chain Copilot, B2B SaaS / Supply Chain Operations

- Conducted and synthesized 15 interviews across logistics, supply chain, and operations to understand operational decisions, alert fatigue, approvals, and trust in AI recommendations.
- Defined product requirements for explainable alerts, confidence indicators, data provenance, approval thresholds, correction history, and human oversight.
- Translated research patterns into workflows and interface concepts for decision support across warehousing, transportation, distribution, procurement, production, and workforce operations.

PROFESSIONAL EXPERIENCE

UX Support Host, Ibmecc

Sep 2022 – Present | Salvador, Brazil

- Provide remote academic and technical support across virtual learning platforms, resolving access, navigation, submission, and workflow issues for students and faculty.
- Guide users through academic processes and platform procedures with clear, user-centered communication, serving as a first-line source of UX feedback for the platform.
- Identify recurring usability patterns and friction points from support interactions and relay findings to academic and technical teams.
- Contribute practical recommendations on interface clarity, support content, and accessibility, grounded in direct observation of user behavior.
- Develop practical insight into remote user behavior and digital education UX challenges, applying these observations to a broader product design practice.

Visual Designer & UX/UI Designer, Freelance, Criativas

Dec 2019 – Present | Salvador, Brazil

- Designed visual identities, customized products, and digital and print communication assets for freelance clients, translating business and communication needs into clear, consistent visual solutions.
- Created layouts and interface concepts with attention to visual hierarchy, information structure, responsiveness, and usability.
- Expanded practice into UX/UI through self-initiated product studies covering research synthesis, information architecture, user flows, prototyping, accessibility, and design systems.
- Developed high-fidelity and coded prototypes to explore complex digital workflows, clearly identifying each project's independent nature, validation status, and intended outcomes.
- Applied basic front-end knowledge in HTML and CSS, with introductory familiarity in JavaScript, React, and TypeScript, to understand implementation constraints and review interface behavior.

Graphic Design Assistant, Cultura Inglesa

Mar 2018 – Dec 2019 | Salvador, Brazil

- Designed brand-aligned presentations and communication assets for educational and institutional initiatives across print and digital formats.
- Translated requests from internal teams into clear, audience-appropriate visual solutions, balancing brand guidelines, content needs, and delivery requirements.
- Adapted print materials for digital channels, maintaining visual consistency, readability, and hierarchy across formats.
- Collaborated with internal teams to refine layouts and strengthen visual consistency across organizational touchpoints.

Graphic Designer & Web Interface Designer, Natuseg

Dec 2013 – Feb 2018 | Salvador, Brazil

- Designed and maintained visual assets and interface layouts for the company website and internal systems, supporting digital communication and operational workflows.
- Collaborated with developers to translate business and content requirements into page structures, interface components, responsive mockups, and practical design specifications.
- Created prototypes to clarify navigation, interaction patterns, and interface behavior before implementation, strengthening consistency across digital touchpoints.

EDUCATION & PROFESSIONAL DEVELOPMENT

Postgraduate Degree, IT Management (Data Governance), Unijorge	<i>Jul 2024 – Jul 2025</i>
Bachelor's Degree, Pedagogy, Centro Universitário UniFatecie	<i>Sep 2023 – Expected Feb 2027</i>
Postgraduate Degree, Psychopedagogy, Centro Universitário UniFatecie	<i>Aug 2023 – Feb 2024</i>
Bachelor's Degree, Graphic Design, Unijorge	<i>Feb 2012 – Dec 2016</i>
Front-End Development, Course, Origamid	<i>Dec 2022 – Dec 2024</i>
Certification: HTML e CSS para Iniciantes,
